att'n Dr. Istvan Horvath

Dear Istvan,

I am sorry for being slow to answer your very swift reply. I have been thinking of the best plan for both of these meetings.

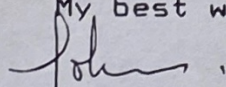

Would you investigate the possibility to go by the train and return by the plane? Possibly it will be not too expensive. I will plan to arrive in Budapest six days before the time of the Kazan Congress and to be in Europe for two weeks. I enclose a copy of the invitation to attend, which was arranged by Professor Borisenko.

If the train and plane is too difficult for your schedule, we can do everything by air. But get the costs and I will give you my American Express # to pay it, whichever we decide.

In the matter of the effect of one challenge in the rabbit model, thank-you for sharing the result with me. I think that our American colleagues would have noticed and so maybe I am wrong about syphilis, or the rabbit may not be a good model except as we now understand it for the culture of treponemes and the early syphilis.

In the matter of the Mor Kaposi meeting in August, I would like to make a poster on co-factors, category 1.) on the invitation. Could you please ask them at Malev Congress Dept to send me the registration and second announcement? If I am accepted for such a poster, and even if not, I will return to Budapest for the last week of August for the Congress.

My best wishes to your family,

John
